

The Inventors of the Carousel Dishmachine
Adamation is the originator of the carousel concept, and has been the industry leader for nearly 50 years. The space utilization, ergonomics, design flexibility and labor savings are unmatched by any other style of machine.

Steam Booster

Steam-powered Water Temperature Booster
Automatically controlled heat exchanger system capable of 40° to 70° F minimum temperature rise in water passed through core.

ABHS - Steam Booster Heater

STANDARD FEATURES

- Provides 180° Rinse Water
Necessary to comply with NSF standards.
- Self-contained Heat Exchanger
Fitted with all necessary controls and plumbing connections.
- Automatic Solenoid Control Valve
Electronically linked to dishmachine conveyor drive system.
Heats water only when dishmachine is in use.
- Pressure Relief Safety Valve
- Steam Pressure from 5 to 15 p.s.i.
- Reversible Brackets for Floor or Machine Mount
